Subject: 2010 Annual Site Environmental Report for the Lawrence Livermore National Laboratory

The Annual Site Environmental Report was prepared by the Lawrence Livermore National Laboratory (LLNL) for the Department of Energy/National Nuclear Security Administration (NNSA)/Livermore Site Office. This report provides a comprehensive summary of the environmental program activities at LLNL for Calendar Year 2010. This report is prepared annually and is made available to relevant regulatory agencies and other interested organizations and individuals.

The information in this report has been reviewed by NNSA and LLNL personnel for accuracy. The review was based on quality assurance and quality control protocols applied to monitoring and data analyses at LLNL.

Remediation activities continue to reduce contaminants at LLNL, and environmental monitoring of emission sources indicates compliance with environmental regulations.

LLNL continues to show commitment to protecting the environment by implementation of its Environmental Management System, which provides the framework for integrating environmental protection into its work planning processes.

Sincerely,

Heather Larson  
Assistant Manager for  
Environment, Safety and Health
