

Environmental Report Reader Survey

To Our Readers:

Each annual Environmental Report publishes the results of environmental monitoring at the Lawrence Livermore National Laboratory and documents our compliance with environmental regulations. In providing this information, our goal is to give our readership—whether they be regulators, scientists, or the public—a clear accounting of the range of environmental activities we undertake, the methods we employ, and the degree of accuracy of our results.

It is important that the information we provide is easily understood, is of interest, and communicates LLNL's effort to protect human health and the environment. We would like to know from you, our readers, whether we are successful in these goals. Your comments are welcome.

1. Is the technical level too high? too low? uneven? just right?
2. Is the writing too concise? too verbose? uneven? just right?
